Sepand Ali Madad Soltani

Education

K.N. Toosi University of Technology

Bachelor of Science in Electrical Engineering Concentration: **Electronics Engineering** GPA: 16.26/20 (Last two years: 17.29/20) GPA 4.0 scale: 3.37 (Last two years: 3.72) Tehran, Iran **Anticipated** in February 2023

Academic Projects

Classification of Mild Cognitive Impairement(MCI) and Alzheimer's disease patients using Deep Neural Network based on fMRI images and EEG signals

Summer 2022 (Ongoing)

Studied the previous works on this subjects for finding the gap (Still early stages of the project)

Playing a Video game (Tetris) using Deep Reinforcement Learning

Summer 2022 (Ongoing)

- Developed the game from scratch using C++
- Created a custom Python to C++ API for calling to the game from python script using Pybind11 library
- Developed a Deep Q learning agent for training the AI to play the game

The Game of Tetris with a Custom Game Engine Using OpenGL in C++

Spring 2022

- Developed a custom 2D graphics renderer completely from scratch using the OpenGL graphics API in C++
- Added game functionalities, menus and text rendering capabilities to the engine
- Designed and implemented the game of <u>Tetris</u> using the said engine in Object Oriented C++

Implementation of Synthesizable A* Search Algorithm in FPGA-VHDL

Spring 2021

- Developed a synthesizable VHDL code for A* algorithm capable of solving any 10x10 mazes
- Developed a python script for generating random mazes
- Simulated and tested the algorithm for solving random mazes using VHDL test bench

Smart Temperature Detection PCB Circuit Design

Summer 2020

 Designed circuit schematic and PCB layout using Altium designer (Key components: ATMEGA64 and SIM800C)

Calculating the Magnetic Field Caused by a Spherical Solenoid

Winter 2019

- Derived the formula for the magnetic field caused by a spherical solenoid
- Calculated and graphed the magnetic field on multiple plates
- Integrated the graphs and the calculator in a custom GUI developed using MATLAB App Designer

Skills

- Software: C++, Python, VHDL, MATLAB, PSpice, Proteus design suite, Altium Designer, AVR C
- Hardware: Arduino, Various wireless communication modules (BLE, RF, GSM, IR and ESP8266)
- Language: Persian(Native), English(Fluent), intermediate French(A2)
- Online Courses and Certificates: Certificate of MATLAB from Sharif University, Certificate of Altium Designer from K.N. Toosi University of Technology

Work Experience

Razeq Co.

Tehran, Iran Summer 2021

Electronics Engineer Internship

 Researched the design and development process of a parametric speaker (directional speaker) and examined the feasibility of manufacturing it

- Implemented smart presence detection and remote-control support for the monitor stand in Valiasr Street Museum
 Developed and assembled various hardware for installation in Iran's pavilion in Dubai Expo 2020 (Electric control panel, wiring, lighting and presence detection system)
